

Outset Medical Presents New Data on Home Dialysis at National Kidney Foundation Spring Meetings

April 6, 2022

Findings Show Tablo® Hemodialysis System Increases Patient and Physician Likelihood to Adopt Home Hemodialysis (HHD)

SAN JOSE, Calif.--(BUSINESS WIRE)--Apr. 6, 2022-- Today, [Outset Medical, Inc.](#) (Nasdaq: OM) ("Outset"), a medical technology company reducing the cost and complexity of dialysis, announced the release of three new data sets related to home dialysis.

The scientific papers were presented during the 2022 National Kidney Foundation (NKF) Spring Clinical Meetings in Boston, Massachusetts, April 6-10. The meetings bring together renal healthcare providers, including nephrologists, nurses, technicians, social workers, dietitians, and others in the space to learn more about the newest developments in advancing kidney care.

The results shared by Outset highlight patient and nephrologist views on home hemodialysis (HHD) adoption and hidden costs of peritoneal dialysis (PD):

- A national survey of 202 dialysis patients found that 72 percent viewed the features of the Tablo Hemodialysis System as a significant clinical improvement in home hemodialysis, and 77 percent said the Tablo's features would make them more likely to try home hemodialysis.
- A second national survey of 184 nephrologists found that 77 percent said the features of Tablo were a significant improvement over existing home hemodialysis devices and 98 percent said these features would make them more likely to recommend home hemodialysis to their patients.
- The third data set evaluated the cost of PD failure. PD failure is associated with nearly 100 percent risk of hospitalization during the 6 months preceding discontinuation. The study found that over \$72,000 is spent per patient in the 3 months before and 3 months after PD failure. Further, after the transition from PD to in-center hemodialysis, hospitalizations remain higher for former PD patients over time.

"Ongoing research and continuous innovation are critical to our mission at Outset to improve the lives of those in need of kidney care," said Dr. Michael Aragon, Chief Medical Officer of Outset. "The data Outset presented at this meeting highlights the potential advantages of Tablo to both patients and providers, and potential cost reduction benefits of earlier PD to HHD conversions when signs are present that PD is no longer producing optimal results for patients."

The three research papers can be read in their entirety on the [Outset clinical evidence page](#) or at the Outset booth (#804) during the NKF meeting.

About Outset Medical, Inc.

Outset is a medical technology company pioneering a first-of-its-kind technology to reduce the cost and complexity of dialysis. The Tablo Hemodialysis System, FDA-cleared for use from the hospital to the home, represents a significant technological advancement that transforms the dialysis experience for patients and operationally simplifies it for providers. Tablo serves as a single enterprise solution that can be utilized across the continuum of care, allowing dialysis to be delivered anytime, anywhere and by anyone. The integration of water purification and on-demand dialysate production enables Tablo to serve as a dialysis clinic on wheels, with 2-way wireless data transmission and a proprietary data analytics platform powering a new holistic approach to dialysis care. Tablo is a registered trademark of Outset Medical, Inc.

Forward-Looking Statements

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements include statements regarding Outset's beliefs, projections and expectations concerning, among other things, the potential impact of the research results discussed in this press release. Forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified, which could cause actual results and other events to differ materially from those expressed or implied in such statements. These risks and uncertainties include risks described in the Risk Factors section of Outset's most recent annual report on Form 10-K and quarterly report on Form 10-Q filed with the U.S. Securities and Exchange Commission. These forward-looking statements speak only as of the date hereof and should not be unduly relied upon. Outset disclaims any obligation to update

these forward-looking statements.
